

Help detect northern giant hornets

WATCH A WASP NEST!

WSDA invites you to help watch for northern giant hornets (*Vespa mandarinia*).

Join our community science project to locate active paper wasp nests, watch the nests weekly, and record your observations from June through October.

Here's how to participate:

LOCATE

Starting in June, locate paper wasp nests you can monitor through October and log the nest locations at agr.wa.gov/hornets.

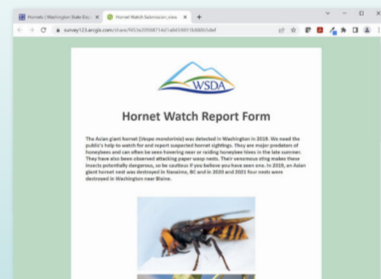

MONITOR

Each week, check the nests and visit agr.wa.gov/hornets to report whether or not there was wasp or hornet activity at the site.

REPORT

If you think you see a hornet, safely get a picture and report it either online at agr.wa.gov/hornets or by emailing hornets@agr.wa.gov.
