

Service	Fee
Fusarium circinatum / Gibberella circinata (Pitch Canker) Testing	\$65 per sample
Tilletia controversa (Dwarf Bunt) & Urocystis agropyri (Flag Smut)	\$70 per sample
Apple Post Harvest Rot: Testing for presence of Neofabraea spp., Phacidiopycnis washingtonensis, Sphaeropsis pyriputrenscens	\$155.70 per sample
Established quantitative PCR testing for a single Sample	\$105: Each additional PCR is \$45.
Established qPCR testing for more than 12 samples	\$32 per sample: \$8 for each additional PCR.
Established conventional PCR testing for a single Sample	\$145: Each additional PCR is \$85.
Established PCR testing for more than 12 samples	\$35 per sample: Each additional PCR per samples is \$10.
Bacterial ID	\$80.00
Microscopy	\$65 per sample
Fungal Testing	\$65 per sample
ELISA testing for virus, fungal and bacterial diagnostics	\$160 for first sample. \$15 Each additional sample.
Sequencing of Barcoding Region of an isolated pathogen or single organism	\$ TBD

Please contact us if there is a pathogen or other testing that is not listed. We may be able to establish testing.

Listed fees are subject to change based on testing material availability.
