

What are Acelepryn® G and Acelepryn®?

Acelepryn® G is a dry granular pesticide. Acelepryn® is the liquid form of Acelepryn® G.

These products kill eggs, grubs, and adult Japanese beetles. These pesticides are not a risk to mammals, birds, or fish.

EPA approved for grass on athletic fields, parks, playgrounds, and lawns, as well as, flowerbeds and bushes planted around homes, schools, and businesses.

What are the ingredients?

Acelepryn® G and Acelepryn® are commercial pesticides with the active ingredient chlorantraniliprole. Acelepryn® G contains limestone clay and an ingredient that binds the active ingredient to the clay. Acelepryn® contains small amounts of the preservatives 1, 2-benzisothiazol-3(2H)-one; and bronopol. There have been no reports of allergic reactions in people exposed to Acelepryn® G or Acelepryn®.

EPA says these pesticides are in the reduced-risk category. That means they pose less of a risk to human health and the environment than other pesticides used for the same purpose.

Health concerns of Acelepryn® G and Acelepryn®?

When used as directed, Acelepryn® G and Acelepryn® aren't dangerous for people. Washington State Department of Health toxicologists concluded they pose very low concern for health. EPA concluded that Acelepryn® G and Acelepryn® are not dangerous to domestic animals, including dogs. Studies have shown Acelepryn® is of low risk to bees when applied according to label requirements.

There have been no reports of symptoms or illness following applications of Acelepryn® G or Acelepryn® in Washington.

The active ingredient is harmful to aquatic invertebrates such as crayfish and water fleas. Do not apply these pesticides near bodies of water.

Public Health Recommendations

Acelepryn® G and Acelepryn® have an excellent safety record when used as directed. If you're still concerned, you can limit direct contact with the product by following the safety recommendations:

- Avoid the area and keep pets inside until the treatment has dried.
- If you come in contact with the pesticide, wash the affected skin with soap and water.
- Remove and wash exposed clothing. Keep and wash clothing separate from other laundry.
- Experts do not expect health concerns from eating produce grown in Acelepryn® G or Acelepryn® treated soil.

Talk to your health care provider if you have health concerns related to Acelepryn® G or Acelepryn®.
