**Tip!** A post harvest material is a substance that is used on a raw organic crop prior to packaging or processing of the crop. These direct food contact materials include sanitizers, floatation agents, waxes, and sprouting inhibitors. In order to use a direct contact material with an organic crop, the material must be an approved natural product or must be listed in the National Organic Standards (National List § 205.601, 205.605, 205.606).

1. Please indicate what type(s) of post harvest materials are used at your facility. Check all that apply.
   - [ ] NONE - **Go to Next Section**
   - [ ] Anti-Microbial Agents
   - [ ] Anti-Fungal Agents
   - [ ] Anti-foaming agents
   - [ ] Sanitizers
   - [ ] Sprouting Inhibitors
   - [ ] Other (please specify):

2. Does your operation use a material prohibited for direct contact with organic products on any Non-Organic products that are handled on or with shared equipment?  
   - Yes  
   - No

2a. If “Yes,” describe how you ensure prohibited materials do not contaminate organic products.

---

**Tip!** Any post harvest materials used in the course of organic handling must be included on your non-organic substance spreadsheet. Materials may be added or removed at any point in the year by contacting the Olympia office.
