

ORGANIC SYSTEM PLAN – HANDLERS AND PROCESSORS

Business Name:	Certification Number:
Name of Individual Completing this Form:	County:

Section E. Post Harvest Materials

[NOS 205.105, 205.272, 205.601, 205.605]

Not Applicable – No organic products are handled or stored (e.g. Brokerage and Marketing Companies)

Tip! A post harvest material is a substance that is used on a raw organic crop prior to packaging or processing of the crop. These direct food contact materials include sanitizers, floatation agents, waxes, and sprouting inhibitors. In order to use a direct contact material with an organic crop, the material must be an approved natural product or must be listed in the National Organic Standards (National List § 205.601, 205.605, 205.606).

1. Please indicate what type(s) of post harvest materials are used at your facility. Check all that apply.

| <input type="checkbox"/> Floatation Agents | <input type="checkbox"/> Sprouting Inhibitors | <input type="checkbox"/> Other (please specify): |

2. Does your operation use a material prohibited for direct contact with organic products on any Non-Organic products that are handled on or with shared equipment? Yes No

2a. If "Yes," describe how you ensure prohibited materials do not contaminate organic products.

Tip! Any post harvest materials used in the course of organic handling must be included on your non-organic substance spreadsheet. Materials may be added or removed at any point in the year by contacting the Olympia office.
