Who Needs to Take the New Post-Harvest Fruit and Vegetable Exam?

Only NEW licensees or those testing to RECERTIFY will need to take this exam. Currently licensed individuals will be grandfathered in. The new “Limited Specialty” category does not change who is required to get a license. The new classification has only created a specialized exam category for certain groups of licensees who either had been taking an exam that was a poor fit for the type of work they are doing or no category at all. If you apply pesticides to post-harvest fruits and vegetables, please use the flow chart, below to determine what licensing you need.
