

2018 Freshwater Emergent Weed Monitoring Report

For

Herbicide Applications to Freshwater Emergent Noxious and Quarantine Weeds
performed under the Noxious Weed National Pollutant Discharge Elimination
System (NPDES) Permit WAG993000

Prepared by

Washington State Department of Agriculture
Pest Program
January 2019

NPDES WAG993000 requires that the Washington State Department of Agriculture (WSDA) submit an annual freshwater emergent weed monitoring plan to the Washington State Department of Ecology (WSDOE) and conduct monitoring as necessary.

WSDA proposed to monitor bispyribac-sodium, carfentrazone-ethyl, flumioxazin or penoxsulam treatments if these active ingredients were used under the permit in 2018. No applications of these ingredients occurred under the permit in 2018.
