

WHY ARE SALES PROHIBITED?

Noxious weeds and other invasive plants cost Washington millions of dollars in lost production, public and private control costs, and environmental degradation each year. Escaped ornamental plants can displace native plant communities, damage range and recreational lands, and degrade fragile wetlands. Quarantines prevent the continued introduction of problem plants into Washington.

WHICH PLANTS AND SEEDS ARE PROHIBITED?

Noxious Weed Seed and Plant Quarantine WAC 16-752-600

It is prohibited to transport, buy, sell, offer for sale, or distribute plants or plant parts of the regulated species listed here into or within the state of Washington or to sell, offer for sale, or distribute seed packets of seed, flower seed blends, or wildflower mixes of these regulated species into or within the state of Washington.

Please Note: Regulated status applies to all synonyms of these plants and interspecies hybrids if both parents are regulated species.
