

**KARNAL BUNT NATIONAL SURVEY
FINAL REPORT
FAIN: AP17PPQFO000C276
Funding Opp.: USDA-APHIS-10025-PPQFO000-17-0406
June 1, 2017 – May 31, 2018**

Wheat samples from the 2017 harvest in Washington State were collected by WSDA personnel from half of the wheat producing counties in the state. Counties sampled in Washington are rotated every other year, so counties sampled in 2017 were not sampled in 2016. Samples collected from a given county were based on 2012 harvest statistics with one sample collected per one million bushels of wheat production. Listed below are the counties and number of samples collected for the 2017 survey:
