Date to ECY: _____ Product #: _____ Initial: _____

Date from ECY – Incomplete: _____ Product #: _____ Initial: _____

Date from ECY: _____ Product #: _____ Initial: _____

****It is recommended, but not required, that international registrants have a US Agent.****

Fertilizer New Product Registration Checklist

- Form 4300A**, "Application for Registration of Commercial Fertilizers." Include company name and address. If address on the label is different than address on the application, complete the section on the application for label address information. An incomplete application will delay the processing of your application and may result in forfeiture of the application fee.
- Remittance** of \$50.00 per product. This is an application fee and not refundable.
- Form 4300B** "Commercial Fertilizer Product Registration."
- Safety Data Sheet (SDS)** if your product is subject to Globally Harmonized System (GHS).
- Copies of laboratory analyses** of the nine metals for each product.

Ensure the laboratory has noted the required preparation and analytical methods on the metal report submitted to WSDA. Verify the product name, as it appears on the label, is on the laboratory report.

The approved methods can be found at:

<http://agr.wa.gov/PestFert/Fertilizers/docs/FertRegGuidDoc.pdf>.

- Product Label:** Labels should be submitted electronically to FertReg@agr.wa.gov in a searchable PDF, at 300 dpi with the following standard file name format: Company# (if assigned)_ProductNameN-P-K.pdf.
(Example = 1960_HappyDays10-10-5.pdf)
 - Company# (if assigned) = Four position WSDA number, with lead zeros, followed by an underscore.
 - ProductName = Enter first line of product name on the label followed by N-P-K. No spaces between label names; capitalize the first letter of each word.

The PDF file should be created directly from the electronic source document. Please optimize PDF labels before attaching these documents in emails in order to reduce file size and improve display speed on the web. The e-label must be in Print-Ready format. Print-Ready means the e-label can be printed on 8.5 x 11 inch paper without WSDA personnel having to perform numerous printer formatting actions. Printer proof marks should not be on the label. The printed label must be legible without the use of a magnifying glass. **Be sure the label includes a WSDA approved internet statement.**

Use of the WSDA Registered Organic Material logo, the phrase "Certified for use in organic production" or any other organic use claim will be verified by WSDA Registration Services. Labels or labeling bearing false claims will be rejected. **Remember:** All fertilizers must be registered with WSDA Registration Services before they can be approved by WSDA Organic Materials Review. Do not include the WSDA Organic logo on your label until it has been approved by WSDA Organic Program.

- Ecology Questionnaire:** Must be completed and submitted for each waste-derived product and micronutrient fertilizer.

Your company will receive a WSDA Fertilizer Registration Certificate by email as confirmation of product registration.

Submit originals to WSDA and keep copies for your file.

(For additional information see the [Fertilizer Registration Guidance Document](#).)
