

Commercial Fertilizer Product Registration (4300B Form)

A Completed Form 4300A Must Accompany This Form

PLEASE REFER TO INSTRUCTIONS TO COMPLETE THIS FORM

COMPANY INFORMATION		
COMPANY NAME	WSDA COMPANY #	DATE

DEPARTMENT USE ONLY			
WSDA Fertilizer Product Reg. Number	Application Rate	WSDA/EPA Pesticide Reg. No.	Pesticide File No.

PRODUCT INFORMATION

PRODUCT NAME and GRADE (As it appears on the label)

MAXIMUM LABELED RATE OF APPLICATION: (Only if the label contains application directions that can be converted to lbs/acre/year)

Maximum rate of _____ (lbs, gals, oz.) per _____ (acre or sq. ft.) _____ times a year (assume a 7-month growing season) (EX: 2X/Mo = 14 Times)
 If a liquid, enter pounds per gallons here _____

GUARANTEED ANALYSIS (%)													
N		Ca		B		Cu		Mo		LIME			GYPSUM
P ₂ O ₅		Mg		Cl		Fe		Na		CaCO ₃	MgCO ₃	CaCO ₃ (eq)	CaSO ₄ ·2H ₂ O
K ₂ O		S		Co		Mn		Zn					

GUARANTEED MAXIMUM METALS CONCENTRATION (PPM)																
As		Cd		Co		Hg		Mo		Ni		Pb		Se		Zn

**ENTER A VALUE GREATER THAN OR EQUAL TO THE RESULT OR DETECTION LIMIT. (WHICHEVER IS GREATER)
 ND, BDL, MDL, ZERO AND BLANK ARE NOT PERMITTED.**

ECOLOGY INFORMATION	
1. Does your label guarantee any of the following: total nitrogen (N), available phosphate (P ₂ O ₅), soluble potash (K ₂ O), calcium (Ca), magnesium (Mg), sulfur (S)?	Yes <input type="checkbox"/> No <input type="checkbox"/> (Micronutrient Fertilizer)
2. Is your fertilizer free of all waste ingredients?	Yes <input type="checkbox"/> No <input type="checkbox"/> (Waste-Derived)
* If you answered "No" to either 1 or 2, follow the instructions on the most current Ecology Questionnaire for additional testing requirements.	

ORGANIC INPUT MATERIAL REVIEW	
Do you intend to submit this product to WSDA Organic Program for review as an Organic Input Material?	Yes <input type="checkbox"/> No <input type="checkbox"/>
If yes, you may submit the applications concurrently. A SEPARATE APPLICATION IS REQUIRED. You can find application forms and more information on the WSDA Organic Program at: https://agr.wa.gov/foodanimal/organic/materialslists.aspx or by calling (360) 902-1805.	

(Please read all instructions before completing this form)

A completed 4300B form is required for registration. An incomplete form will delay the processing of your application.

PRODUCT INFORMATION:

- **Product Name and Grade:** Enter the complete name found on the product label. Include the grade (N-P-K) if it is not 0-0-0.
- **Maximum Labeled Rate of Application:** If the product label includes application rates, complete this section using the highest rate and maximum number of applications allowed during a growing season (a growing season in Washington is assumed to be 7 months.) Example: If a product's directions for use state "Apply 1-3 lbs/1,000 sq. ft. once each month," the calculation would be 3lbs x 1,000 sq. ft. x 7. Leave this section blank if the label has no directions for use.

GUARANTEED ANALYSIS %:

- Enter the values to match the guaranteed analysis on the product label. Do not list values for nutrients not guaranteed on the label.
- The values must be entered as a percentage. Parts per million (ppm) and other methods of measurement are not allowed.
- All limes must include guarantees for calcium and/or magnesium carbonate (CaCO₃ and/or MgCO₃) and calcium carbonate equivalent (CaCO₃eq).
- Gypsum must include guarantees for calcium sulfate (CaSO₄·2H₂O) and sulfur.

Continued on next page

GUARANTEED MAXIMUM METALS CONCENTRATION (PPM):

- A value must be entered for each of the nine metals. It must be reported in parts per million (ppm) and must be equal to or greater than (\geq) the value found on your laboratory report.
- **If the laboratory report indicates ND (non-detect), BDL (below detection limit), or MDL (minimum detection limit),** you must enter a value equal to or greater than (\geq) the ND, BDL, or MDL.
- To account for variability in source material as well as sampling and analytical variation, many companies choose to report values higher than those found on the laboratory report. This is acceptable as long as the reported value allows the product to meet the established metals standards.

COMPANY INFORMATION:

- Company Name: Enter the name of the company as it appears on the form 4300A.
- WSDA Company Number: You can find your company number on your current registration certificate. If you are applying for the first time, leave this box blank.
- Date: Enter the date you submit the registration.

ECOLOGY INFORMATION:

- Solid waste is defined in chapter 70.95 and 70.105, but does not include biosolids or biosolid products regulated under chapter 70.95J RCW or waste water regulated under 90.48 RCW.
- A micronutrient fertilizer is defined as a fertilizer that guarantees B, Cl, Fe, Mn, Mo Na, or Zn, but does not guarantee N, P₂O₅, K₂O, Ca, Mg or S.
- Products containing guano (bat, bird) are always considered waste-derived and must go through Ecology review.
- If you answered "No" to either 1 or 2, follow the instructions on the most current Ecology Questionnaire for additional testing requirements.

FERTILIZER/PESTICIDE PRODUCTS:

- Dual products require registration as both a Fertilizer and a Pesticide.
- Information for Pesticide registration can be found at <http://agr.wa.gov/PestFert/Pesticides/ProductRegistration.aspx>.

ORGANIC INPUT MATERIAL REVIEW:

- Products intended to be distributed as compliant with organic standards may submit an application to the WSDA Organic Program. NOTE: A separate application is required if you would like your input material registered by WSDA for use in organic agriculture or handling.
- WSDA Commercial Fertilizer Registration and WSDA Organic Input Material Review applications may be submitted concurrently. However, WSDA Organic Input Material registration cannot be granted for fertilizers until the product is properly registered with WSDA as a Commercial Fertilizer.
- Product label and marketing information must not include the WSDA Organic Registered Material Logo until the product has been issued a registration certificate by WSDA Organic Program.
- Application forms and more information on the WSDA Organic Program and the USDA organic standards can be found at: <https://agr.wa.gov/foodanimal/organic/materialslists.aspx> or by calling (360) 902-1805.
